

I CLAIM:

1. A writing implement having a writing head supported
by an elongate shank and an elongate handle that fits
end-to-end to the shank in a writing configuration for
normal use, in which the handle is pivotable connected
to the shank and folds over the shank and is held
against the shank the implement is in a folded
configuration.

10

2. A writing implement according to claim 1, in which
the pivotable connection is spring biased to restrain
the shank and handle towards the writing configuration.

15

3. A writing implement according to claim 2, in which
a remote end of the handle manually releasably locks to
a remote end of the shank to hold the writing implement
in the folded position.

20

4. A writing implement according to claim 1, in which
the handle extends over an end of the shank and the
writing head in the folded configuration.

25

5. A writing implement according to claim 1, including
a pocket clip mounted to and extending along a side of
the handle.
